ABOUT COURSE IOT WITH AI

COURSE CONTENT

ABOUT AICTE-ATAL FDP COURSE ON IoT WITH AI

The Internet of Things, or IoT, refers to the billions of physical devices around the world that are now connected to the internet for collecting and sharing data for various advance computing applications. In recent years, the use of the Internet of Things (IoT) has increased exponentially, but artificial intelligence (AI) is the real driving force behind the IoT's full potential. Individually, the Internet of Things (IoT) and Artificial Intelligence (AI) are powerful technologies. When you combine AI and IoT, you get AIoT—the artificial intelligence of things. The IoT concept has given the world a higher level of accessibility, integrity, availability, scalability, confidentiality, and interoperability in terms of device connectivity.

The Department of Computer Sc. and Engineering, CCET (Degree Wing) Chandigarh, in association with AICTE-ATAL academy, is going to organize Online FDP on “IoT with AI” to train the faculty/research scholars on the importance of AI to the IoT themes of applications. This FDP aims to give a series of technical conceptual presentations with practical demos-based sessions (using Arduino and Raspberry Pi with other relevant technologies) on various topics related to IoT and AI.

Domain Certification:

NPTEL has been giving out course level certificates since 2014 and there have been quite a few students doing multiple courses from NPTEL.

Some need guidance on what courses to take up together and also a classification of courses based on the end goal, whether it is appearing for some competitive exam or becoming job ready or specialising in an area of study.

Domains are being created in multiple disciplines (more domains will be put out as newer courses are created).

The Domain Certification helps the learner's to gain expertise in a specific Area/Domain.

Every domain will comprise Core courses and Elective courses.

This can be helpful for learners who wish to work in a particular area as part of their job or research.

Kindly refer to the following link for the list of courses available under each domain: <https://nptel.ac.in/noc/Domain/discipline.html>

NPTEL Stars:

Over the past five years, we have seen a small group of learners coming back repeatedly to NPTEL courses and completing exams with us. The "NPTEL Stars" has been initiated in 2019 to acknowledge such dedicated efforts by learners. We have looked at various meaningful ways in which such learners can take up more than one course exam in NPTEL and have identified 7 broad categories into which these Stars can be classified.

Categories: NPTEL Domain Scholar, NPTEL Superstars, NPTEL Evangelists, NPTEL Motivated Learners, NPTEL Enthusiasts, NPTEL Believers, NPTEL Discipline Stars.

Please refer this link for more details: <https://nptel.ac.in/nptelStars/index.html>

About FDP

The nearly zero-energy building (nZEB) concept has recently gained prominence worldwide. Large scale adoption and implementation of NZEBs would potentially contribute greatly to greening of the building sector. However, it is still at a nascent stage of niche formation.

As global warming and fossil fuel depletion highlight the need to save energy, demand for energy in buildings is bound to increase. This has recently gained a lot of attention from research communities, early adopters of construction innovations, policy makers as well as green building rating systems, such as Leadership in Energy and Environment Design—LEED, setting ambitious targets to transform the building sector by adopting low, near or net zero energy building concepts.

Although India's green building sector has gained momentum, numerically it can be considered rather small when compared to the number of buildings which are planned to be constructed in the country till 2030. When looking at the estimated 2030 building volume, 70% remains to be constructed. In this view scaling up nZEBs among the new to be constructed volume of buildings can be viewed as a potential "game changer" by curbing GHG emissions and drastically reducing energy demand of the building sector in India. Currently, in India the building sector is responsible for nearly 33% of the total energy consumption. From this perspective, large scale development of nZEBs has the potential to deal with future energy challenges and ensure energy security for the country, which is especially urgent in urban settings. However, this requires structural changes and innovations in policy, regulations, user practices, market incentives, awareness as well as new technology to overcome the existing barriers for green markets. At the moment the market for nZEBs in India is at a nascent stage of niche formation, with only a handful of nZEB demonstration projects running. Results from previous research revealed that the nZEB niche is immature and growing only slowly. Currently, there is no single nationally accepted definition of nZEB in India as the concept is still considered to be in its infancy. However, frontrunners define it as, "highly energy efficient building with extremely low energy demand, which is met by renewable energy sources". Such buildings produce as much energy as they consume (annually).

As per the Bureau of Energy Efficiency, any building whose Energy Performance Index (EPI) is less than 15kWh/square meter/year is termed as the nZEB building.

About DBATU

Dr. Babasaheb Ambedkar Technological University, with its headquarters situated at Lonere, is now a statutory State Technical University established by Government of Maharashtra through special Dr. Babasaheb Ambedkar Technological University Act.

Due to the implementation of academic reforms, the teaching-learning process has undergone significant improvement.

About NIT Patna

National Institute of Technology Patna is the 18th National Institute of Technology created by the Ministry of H.R.D. Government of India after rechristening the erstwhile Bihar College of Engineering Patna on 28.01.2004. NIT Patna marked its humble beginning in 1886 with the establishment of pleaders survey training school which was subsequently promoted to Bihar College of Engineering Patna in 1924. This made this institute the 6th oldest Engineering Institute of India. The Institute is situated on the south bank of holy river Ganges behind Gandhi Ghat (where the ash of father of the Nation, Mahatma Gandhi was offered in the river Ganges). The Institute imparts high level education training, research and development in science, engineering technology and humanities along with high quality education and values at UG, PG and Ph.D. level. At present the Institute offers courses in six major technical disciplines viz. Architecture, Civil Engineering, Computer Science & Engg., Electrical Engg., Electronics & Communication Engg. And Mechanical Engg. It also consists of well-established departments of Physics, Chemistry, Mathematics and Humanities and Social Sciences.

Electronics and ICT Academy

The Ministry of Electronics and Information Technology, Government of India has instituted seven Electronics and Information & Communications Technology (ICT) Academies of which, the academy of NIT Patna is one. The Academy at NIT Patna aims to design and organize basic as well as specialized training programmes in niche areas of electronics and ICT for the development of required knowledge base, skills and tools to equip the teaching community with better knowledge and understanding.

About Department of ECE, NIT Silchar

The Department offers B. Tech in Electronics and Communication Engineering and M. Tech in two specializations (i) Microelectronics and VLSI Design & (ii) Communication and Signal processing engineering. This department also offers a Ph.D. in Electronics and Communication Engineering. The state of art laboratory facilities exist in the department to train the UG, PG, and Ph.D. scholars to carry research in the frontier research areas of Electronics and Communication Engineering. The faculty members are specialized in diverse fields, and there is a commendable research

ambiance in the department. The Department of Electronics and Communication Engineering takes up R&D projects sponsored by various funding agencies such as DST, SERB, BARC, MeitY CSIR, and many more.

About NIT Silchar

National Institute of Technology Silchar is one of the 31 National Institutes of Technology of India and was established in 1967 as a Regional Engineering College Silchar in Assam. In 2002, it was upgraded to the status of National Institute of Technology and was declared as Institute of National Importance under the National Institutes of Technology Act, 2007. NIT Silchar is a fully residential campus situated on the banks of river Barak and on a sprawling green campus spread over 625 acres of land surrounded by scenic tea gardens on the outskirts of Silchar. Objective and Scope

This program will help participants not only to grasp the various deep learning concepts but also their applications. In this era of interdisciplinary research and practice, deep learning concepts are widely used across other engineering domains like industrial automation engineering, mechanical engineering, marine engineering, aeronautical engineering, electrical engineering, chemical engineering and environmental engineering. Therefore, knowing the basics and design techniques enables one to think, create and make efficient use of deep learning for solving problems in their respective domains. This is an attempt to get experts related to deep learning from premier institutes of India and abroad to give participants a good exposure to above aspects of deep learning.

Objectives of the Program

The objectives of the FDP are:

- To impart knowledge of principles and practices in deep learning for academicians, researchers and students.

National Assessment and Accreditation Council (NAAC) has recently awarded 'A+' grade for the Institute's robust infrastructure & excellent academic practices. College is awarded as Best Professional College by SPPU.

ABOUT THE PROGRAM

Technical education system has to be continuously reviewed to meet the requirements of rapid changes in technology and global quality standards. Various governing bodies, at national and international level, have suggested few dimensions for improving quality of education imparted at technical institutions. Few of the major quality dimensions are curriculum updation, academic research and innovative methods in teaching learning, assessment and examination reforms, innovation and incubation, alumna engagement, use of ICT tools and assessment of quality standards. Technical institutions are expected to concentrate on these different quality dimensions for overall quality improvement.

The FDP on "Promoting Quality Culture in Technical Institutions" is aimed at creating awareness of different practices falling under different quality dimensions, and which can be implemented for quality promotion and sustenance in higher level technical institutions.

PROGRAM OBJECTIVES

- To highlight significance of quality improvement in technical institutions.
- To bring quality in higher technical institutions.
- To promote innovative practices and reforms to improve quality of education.
- To improve institute rankings /grading. (NIRF/NAAC/NBA/ABET etc)
- To state importance of IQAC in quality improvement.

TARGET AUDIENCE

Principal, IQAC Coordinators, Head of Departments, NAAC Coordinators, Administrators, Senior Faculty from professional institutions.

There is no course registration Fees.

Shivaji University, established in 1962, is named after the Great Maratha Warrior and founder of the Marathacmpire Chhatrapati Shivaji. One of the major objectives behind foundation of this University was to cater other regional needs of South Maharashtra. The jurisdiction of the University is spread over three districts viz. Kolhapur, Sangli and Satara with strength of about 3,00,000 students studying in 280 affiliated colleges and recognized institutes. The recent phase of the University can be termed as "a pursuit of academic excellence". Since last 4-5 years, several attempts are being made to overcome the image of University as a regional University. The University's efforts towards excellence are being recognized by the substantial grants received from funding agencies like UGC, DST, DBT etc. Another indicator of recognition of University is collaborations with premier institutes in the country. Shivaji University has recently signed MOU with Bhabha Atomic Research Centre, Mumbai for research in Material Science. It has also joined hands with Indian Institute of Geo-Magnetism, Mumbai and industries like Phyto-Pharma. Prestigious institutes like Maharashtra Police Academy, Nashik and Centre for Social Studies, Surat have sought affiliation with the Shivaji University. Shivaji University has been re-accredited by National Assessment and Accreditation Council (NAAC) Bangalore, with "A" Grade (CGPA-3.16) (2014). Shivaji University has bagged the 28th position in the rankings announced by the National Institutional Ranking Framework (NIRF) of Union Ministry of Human Resource Development (MHRD). As per the INFLIBNET report, Shivaji University stands second in use of Nature publications Group's (NPG) e-journal usage in the country. The University has also signed MoU with Centre for Development of Advanced Computing (C-DAC), Pune. Under the agreement, the two institutions will exchange information and communication technology.

Government Residence Women's Polytechnic, Tasgaon
Government Residence Women's Polytechnic, Tasgaon Institute of Technology, a highly commendable women's institute, occupies a place of pride amongst the premier polytechnic in Maharashtra.

Government Residence Women's Polytechnic, Tasgaon was started in 2009 with an objective to impart quality technical education for the overall development of women and the latest need of Society in general and Industry in particular. Institute runs 7 diploma program with 60 intake each.

Resource Centre in Cyber Security and Data Sciences:

National Resource Centre in Cyber Security and Data Sciences is established under the guidance of USA Maharashtra from the grants received from the MHRD, Government of India under the 'Pandit Madan Mohan Malviya National Mission on Teachers and Teaching (PMNMNTT)' scheme. Objective of this centre is capacity building of human resource which is recognized as a critical element to strengthen not only the organization/institutions but even the people at grassroots level by spreading awareness Cyber security. There is a large gap between demand and availability of trained human resource in Cyber Security, who can beneficially utilize the available information for cyber safety. Cyber security trained human resource is needed both as the provider and user of Technology. This is vital for sustainable development so that informed decision making can be done at all levels.

Training:

Data Science- An interdisciplinary field, data science deals with processes and systems, that are used to extract knowledge or insights from large amounts of data. Data extracted can be either structured or unstructured. Data science is a continuation of data analysis fields like data mining, statistics, predictive analysis. A vast field, data science uses a lot of theories and techniques that are a part of other fields like information science, mathematics, statics, chemometrics and computer science. Some of the methods used in data science include probability models, machine learning, signal processing, data mining, statistical learning, database, data engineering, visualization, pattern recognition and learning, uncertainty modeling, computer programming among others. With advancements of so much of data, many aspects of data science are gaining immense importance, especially big data. Data science is not restricted to big data, which in itself is a big field because big data solutions are more focused on organizing and pre-processing the data rather than analyzing the data. In addition, machine learning has enhanced the growth and importance of data science in the last few years.

Data has real value and every information extracted from it can make or break businesses. Analytics is the intersection of business and data science, offering new opportunities for a competitive advantage. It unlocks the predictive potential of data analysis to improve financial performance, strategic management, and operational efficiency. Data analytics can lead to valuable insights that can determine leads to increase sales, fraud detection, pattern recognition and risk prediction in various domains. As part of this initiative, a

Faculty Development Programme (FDP) is conducted to focus on the fundamentals of data science with hands-on sessions on every topic handled using python.

Objectives of Training:

- Train 2000 faculties

PREAMBLE

Modern power systems have grown larger and spaced over larger geographical area with many interconnections between neighboring systems. A sea change has occurred in the energy and power sector. The transmission voltages have reached to Ultra High Voltage level. The understanding of Transient phenomenon is extremely important as during these transients the system is subjected to the greatest stress from the excessive over currents or over voltages that can cause extensive damage to system. The analysis and simulation of electromagnetic transients has become a fundamental methodology for understanding the performance of power systems, determining power component ratings, explaining equipment failures or testing protection devices.

EMTP-RV is the most technically advanced transient analysis software tool used by Power System Engineers for the simulation & analysis of electromagnetic, electromechanical control systems transients in multiphase Electric Power System. Hands-on sessions will be conducted on the use of the software for demonstrating the practical problem cases.
